

\$LUV SUPPLY BREAKDOWN

\$LUV is crypto made easy, fast, and secure.

Objective	\$LUV
● Operation	20,000,000
● Expansion	22,000,000
● Rewards	10,501,600
● Foundation	47,498,400

Operation

The purpose of the Operation pool is to ensure a continuous circulation of \$LUV into the ecosystem.

Private Sale **1,000,000 \$LUV**

On June 24, we offered 1,000,000 \$LUV to private investors in the form of 10,000 high-quality NFTs redeemable for 100 \$LUV each. The private sale is completed and the NFTs were repurposed as a 50% discount to redeem Cured Labs NFTs.

Yield Farming **19,000,000 \$LUV**

Holders of \$LUV can stake their investment into our yield farming protocol, which will yield a daily amount of \$LUV.

30-Day Lock Period					
Multiplier	0 NFTS	1 NFT	2 NFTS	3 NFTS	4 NFTS
Annual Return	2.00%	4.00%	8.00%	16.00%	32.00%
Daily Return	0.01%	0.01%	0.02%	0.04%	0.09%

60-Day Lock Period					
Multiplier	0 NFTS	1 NFT	2 NFTS	3 NFTS	4 NFTS
Annual Return	4.00%	8.00%	16.00%	32.00%	50.00%
Daily Return	0.01%	0.02%	0.04%	0.09%	0.14%

90-Day Lock Period					
Multiplier	0 NFTS	1 NFT	2 NFTS	3 NFTS	4 NFTS
Annual Return	8.00%	16.00%	32.00%	50.00%	99.00%
Daily Return	0.02%	0.04%	0.09%	0.14%	0.27%

APY % Reassessments

Every 6 months, we will reassess and decrease the APY percentage of \$LUV acquired via Yield Farming. In the future, the rates will eventually reach 0%.

We take this approach to control emissions and reward early investors of our project.

Multipliers

District DAO NFTs [Purchase link](#)

These NFTs will be used as x1 multipliers for staking of \$LUV. There are 5 different farms available for staking \$LUV. There are farms with 2x, 3x or 4x Multipliers. Dual-Staking with a District DAO NFTs will count as a 1x multiplier. For example, if a user holds a District DAO NFT, they will have a 1x Multiplier (District DAO NFT x1) and earn additional \$LUV per day.

Cured Multiplier Token [Purchase link](#)

In order to activate the \$LUV multiplier for yield farming, Cured Token holders will need to stake a Cured Token Multiplier along with their \$LUV. We have previously airdropped the Cured Multiplier Token to holders of District DAO NFTs on September 2022.

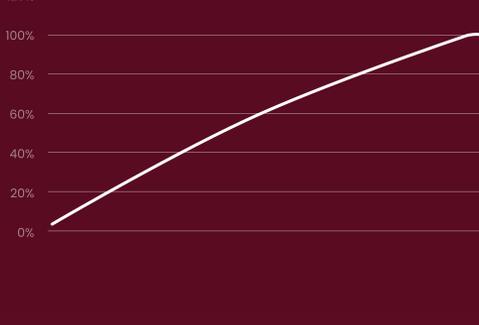

Cozy Corners NFTs [Purchase link](#)

These NFTs will be used as x3 Multipliers for staking of \$LUV. There are farms with 2x, 3x, or 4x Multipliers. Dual-Staking with a Cozy Token NFT will count as a 3x Multiplier. For example, if a user holds a District DAO NFT (plus Cured token) and a Cozy Corner NFT (plus cozy token), they will have a 4x Multiplier (District Dao NFT x1 + Cozy Corner x3) and will earn the maximum amount of \$LUV per day.

Cozy Multiplier Token [Purchase link](#)

In order to activate the \$LUV multiplier for yield farming, Cozy Corner holders will need to stake a Cozy Token Multiplier along with their \$LUV. We have previously airdrop the Cozy Multiplier Token to holders of Cozy Corner NFTs on September 2022.

Operation Vesting Schedule

Expansion

The purpose of the Expansion pool is to further use cases and global adoption of \$LUV.

Sorcery Inc **3,000,000 \$LUV**

Sorcery Inc is a partner project that utilizes \$LUV. The project was created on October 2022 to further the utility and presence of \$LUV in the Solana ecosystem.

Staking Yield End Date

The staking yield of Sorcery Inc NFTs will end on November 2023.

Why is there an end date to staking?

Tokenomics is designed to incentivize an action. Staking incentives holders to passively maintain ownership of an NFT.

What happens when staking ends?

When staking ends, our company's business model will have already changed and we will want to incentivize another action. Another form of emission (with holder benefits) will replace staking at that time. For example, holders will be able to yield \$LUV from purchases in the LUV Market and have access to holder-exclusive items.

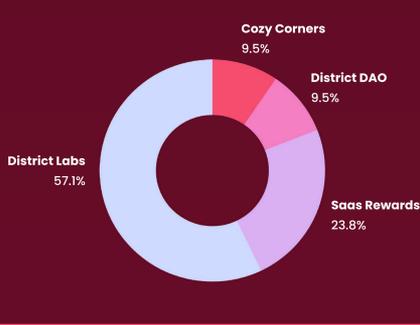

Further details will be released at that time.

Grants **19,000,000 \$LUV**

In an effort to support developers furthering \$LUV use cases, we have allocated a percentage of \$LUV for grants. The tokens in this pool will be awarded to selected individuals or teams. In order to receive these funds, a team would need to apply and be approved by the Foundation. The funds would be provided in a multi-signature wallet with a 12 month cliff. Further details will be provided based on the arrangement by project.

Rewards

The purpose of the Rewards pool is to honor core contributors into the DeFi District ecosystem.

District Labs Halving

\$LUV emissions for District Labs will perpetually cut in half once the \$LUV rewards pool has been perpetually diluted in half. This will continue until the \$LUV rewards pool has hit 0.

Cliff + Vesting

The \$LUV allocated to these groups will be locked for 6 months after the initial release of \$LUV then vested over variable periods depending on the NFT.

Breakdown by NFT

Cursed Labs Holders

At the end of every month, Cursed Labs holders will be eligible to claim a fixed amount of \$LUV.

25 \$LUV Monthly Claim	7/1/2022 First Claim	11/1/2023 Final Claim <small>Based on Emissions</small>
----------------------------------	--------------------------------	--

Cozy Corners

We've allocated 1,000,000 \$LUV to the CozyDAO. These tokens will be released monthly over 38 months. The total supply of NFTs is 50. Over the lifetime of the NFT's existence, they will receive 20,000 \$LUV.

555 \$LUV Monthly Claim	12/1/2022 First Claim	12/1/2025 Final Claim
-----------------------------------	---------------------------------	---------------------------------

District DAO NFTs

We've allocated 1,000,000 \$LUV to the CursedDAO. These tokens will be released monthly over 72 months. The total supply of NFTs is 500. Over the lifetime of the NFT's existence, they will receive 2,000 \$LUV.

28 \$LUV Monthly Claim	12/1/2022 First Claim	11/1/2028 Final Claim
----------------------------------	---------------------------------	---------------------------------

Cured Labs Holders Cost to Upgrade: 1,000 \$LUV

At the end of every month, Cured Labs holders will be eligible to claim a fixed amount of \$LUV.

100 \$LUV Monthly Claim	11/1/2022 First Claim	11/1/2025 Final Claim <small>Based on Emissions</small>
-----------------------------------	---------------------------------	--

SaaS Rewards

A % of rewards are designated towards lab and sorcery holders who actively use DeFi Districts software products such as \$LUV Market, Chatter, Reals and/or LinkD.

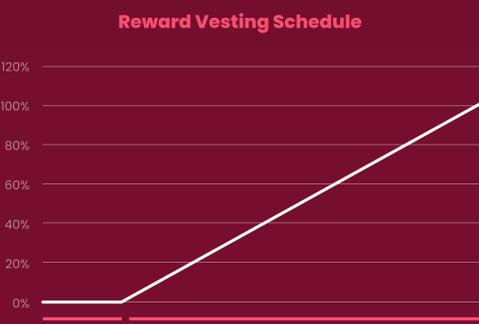

What happens to labs and sorcery after \$LUV rewards end?

Once rewards end from the rewards pool, District Lab and Sorcery holders will be the only ones allowed to continue to yield farm their \$LUV in our staking protocol.

What happens to recaptured \$LUV?

The \$LUV DeFi District recaptures will be used to top up the SaaS rewards pool, support \$LUV initiatives through grants, and allocate a portion to the private investors pool.

Reward Vesting Schedule

Foundation

The purpose of the Rewards pool is to honor core contributors into the DeFi District ecosystem.

DeFi District **35,000,000 \$LUV**

DeFi District is the parent organization that oversees the operations of \$LUV. DeFi District will act as an operational medium, which maintains majority ownership of \$LUV and ensures the stability of the ecosystem via governance. The foundation consists of 7 council members.

Private Investors **12,498,400 \$LUV**

12.50% of \$LUV is reserved for future plans of private investments to accredited investment companies, where the funds will be used to further adoption of \$LUV.
